Job experience

05/28/2024 - Current
Junior Developer & IT Analyst, Case-Mate
In my current position at Case-Mate, I perform a range of IT tasks, including troubleshooting and support. I design and develop websites, ensuring functionality and user experience. Additionally, I manage integrations and workflows using NetSuite and Celigo, optimizing business processes and enhancing system efficiency with the help of other Developers on the team.

02/07/2022 - 03/20/2023
Certified Medical Assistant, Wellstar Douglasville Medical Center
I worked as a Medical Assistant in a busy health clinic with multiple doctors. I checked in patients by obtaining vital signs and recording and updating all patient data in their records. Assist with treatments,follow-up care and recording treatment in the medical record. Learned how to manage all patients records on Wellstar computer system which also included completing and maintaining daily logs, reports, and documentation. Calling patients and contacting them about lab results, medication refill requests, patient calls, requests of advice and other information. I helped train new employees and informed them how to accurately use the computer systems used by the company.

Projects

Personal Portfolio Website

You can view my personal portfolio here that I designed from beginning to end by myself and have hosted with the help of Github.

Weather App - You can view my weather app here.
- Developed a weather application using HTML, JavaScript, and CSS.
- Integrated a weather API to fetch real-time weather data and display it to users.
- Implemented responsive design for optimal user experience on various devices.
- Demonstrated proficiency in front-end development and API integration.

This app is hosted on AWS and the backend is Node.js

Shopify store

I utilized Shopify to gain hands-on experience in various functions of the platform.

- Demonstrated proficiency in setting up and managing product listings, inventory tracking, and order processing within the Shopify environment.
- Developed a keen understanding of Shopify's backend functionalities, including theme customization, payment gateways, and shipping configurations.
- Implemented effective strategies to enhance the online shopping experience for customers through Shopify's features.

Remote Work Setup

Home Office Environment:

- Equipped with a MacBook laptop, high-resolution monitor, and ergonomic desk setup for optimal productivity.
- Configured a private and quiet working area, minimizing distractions and ensuring a conducive environment for focused work.

Career Objective

Dedicated and aspiring professional with a passion for technology and web development. Seeking a challenging role in the tech industry, with a focus on becoming a Software Engineer. Committed to continuous learning and growth, I aim to contribute innovative solutions to enhance organizational efficiency and web-based applications.
